

I fully support RM-10868.

It is widely believed that a better entry class of license is now desireable for the Amateur Service and the proposal set forth here is sensible.

Unlike other current proposals on the subject, this one does not call for a reduction in the material covered on the written examination. It also offers some reasonable access to the HF spectrum for newcomers. I agree fully with the arguments made concerning the retention of Morse skills for the General and Extra class licenses.

This petition is worthy of serious consideration.

Thankyou for the opportunity to comment.
